**Test 1:** The average response time per client search request by measuring the response time seen by the client
Total request: 1000 per client sequentially.
Total files in shared directory: 10 per client
Raw Data = ($ProjectFolder)/Evaluation/Evaluation_1_Results
Code = ($ProjectFolder)/Evaluation/Evaluation_1_Code

**Test 2:** The average response time per client search request by measuring the response time seen by the client when multiple searches are occurring concurrently.

Total requests: 1000 per client

Total clients= 3

Total files in shared directory: 10 per client

Raw Data = ($ProjectFolder)/Evaluation/Evaluation_1_Results

Code = ($ProjectFolder)/Evaluation/Evaluation_1_Code
